Executive Summary — Git and GitHub Lab

Repo Fork: https://github.com/VinceMack/CS472_GitLab

Scott Alexander-Brown seems to be the project maintainer. He has a ton of activity in the first weeks and the finals weeks of activity, but didn't have the most influence on the individual file touches during the lifetime of the repository. Matthew Rollings seems to be the project lead. He has a lot of activity that spans the entire duration of the repository's active time frame, and he made many touches between a large range of files. He performed the most touches. Daniel Kutik, Frieder Bluemle, mat, altvnv, and Mohammed Ezzat had short periods of activity in the project, but had a decent number of touches. Andy Barber, Ivan Vlasov, and matthew provided a couple changes over a short period of time. The remaining, unlisted developers (whose names can be found in the graph on the next page) only had one contribution.

Contributor	Number of Touches
Matthew Rollings	71
Scott Alexander-Bown	53
Daniel Kutik	12
mat	9
altvnv	7
Frieder Bluemle	6
Mohammed Ezzat	5
Andy Barber	3
Ivan Vlasov	2
matthew	2
