# scottyab/rootbeer Activity

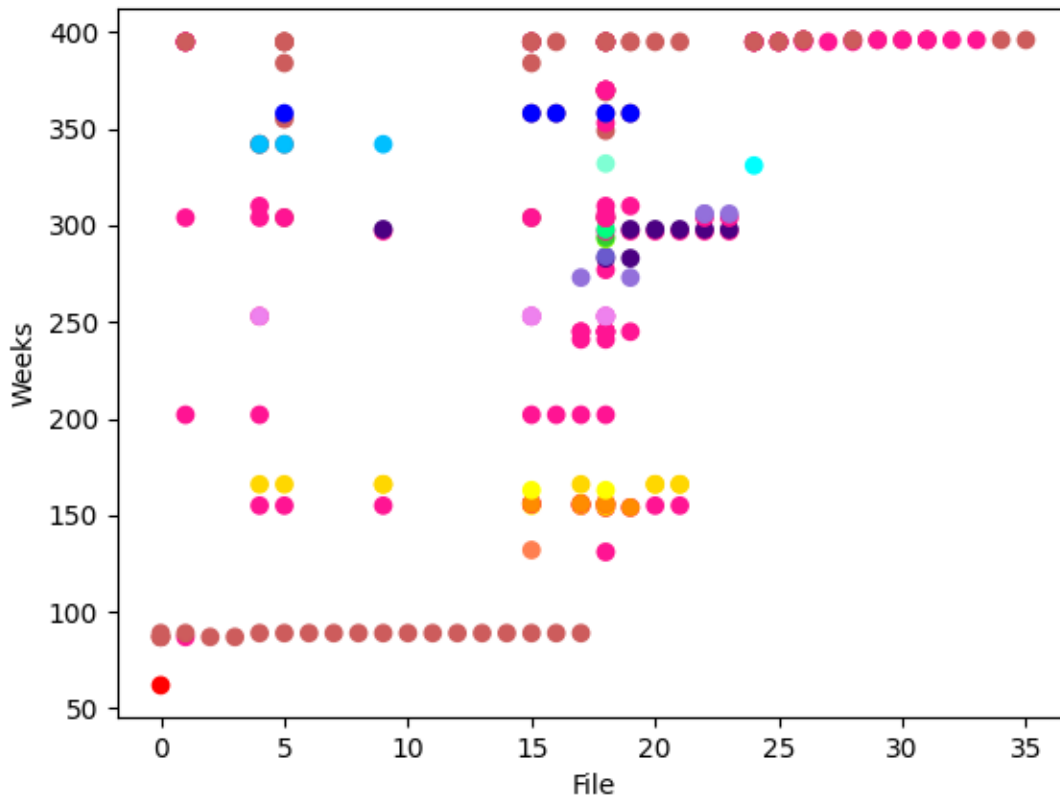

Commit Activity for all Source Files dating from 1/26/2023

| Table Data | Top Performers |
|---|---|
| • 19 Authors represented by a unique color.<br>• 36 Files represented by individual numbers.<br>• Total of 222 commits for all the source files. | 1. Matthew Rollings<br>2. Scott Alexander-Brown<br>3. Daniel Kutik |
| | **Top Changed Files** |
| | 1. File 19<br>2. File 16<br>3. File 6 |

The primarily useful git commands for the lab were git clone, git checkout, git branch, git push, and git pull. They allowed me to add things to my local machine as well as continue to update my personal fork.
